

Boxplot of Volumes's Z-scores for Companies which have a z-score > 20

This figure displays a detailed molecular model of a protein structure, possibly a viral capsid or a large enzyme complex. The structure is composed of numerous blue spheres, representing atoms, which are interconnected by a dense network of black lines, representing chemical bonds. The overall shape is highly symmetrical and complex, with many protruding and recessed regions. The model is shown in a perspective view, highlighting its three-dimensional nature. The background is white, and the structure is centered within the frame.
